

THE 4th SUMMER PROGRAM

“EXPLORING INDONESIAN AGRICULTURE AND TOURISM”

AUGUST 10th-19th 2020

**FACULTY OF ANIMAL AND AGRICULTURAL SCIENCES (FAAS)
DIPONEGORO UNIVERSITY
SEMARANG
2020**

INTRODUCTION

Globalization as an economic, political and social power has pushed higher education institution to involve in international collaboration to gain their position. Higher education institutions must develop strategy to increase competitiveness towards world-class universities through the process of internationalization. Globalization is understood as a catalyst for universities to internationalization their institution.

The main reason for the university to carry out internationalization is to prepare its graduates has an international dimension to entering the labor market. Internationalization also encourages research activities as a form of contribution in solving global problems. Global issues require international collaboration. Likewise, internationalization can also carry out an educational role in promoting international values, which is based on the idea that universities must prepare graduates to become global citizens and understand cultural differences.

To make internalization and to response to the globalization, Diponegoro University (UNDIP) have a mission to be a good reputation in international academic forum. UNDIP have a dream to become a world class university with the indicator is have minimum 500th world ranking by QS. To achieved this goal, it is a must for UNDIP to improve the quality of the international learning atmosphere. Not only for the lecturer but also for the students. So, UNDIP have a commitment to increase the international collaboration with others world class universities through Summer Program.

The 4th Summer Program with the theme “Exploring Indonesian Agriculture and Tourism” is designed by Animal and Agricultural Sciences Faculty, UNDIP to create a new opportunity for students from international universities to learn about Indonesian agriculture system and to introduce Indonesian culture. The 4th summer program have a theme “Exploring Indonesian Agriculture and Tourism”. UNDIP as a host university commits that the program will give benefit for participants through a multitude of unique life experiences which they might not have had in their home countries. This is expected to increase the international atmosphere in the learning process at UNDIP.

The program involves 20 students for 10 days and it is designed by online classes. The program will introduce all participants with Indonesian local environment, including culture, behaviour, and agriculture system. Meanwhile, this program will give benefit to Faculty of Animal and Agricultural Sciences, UNDIP to improve academic atmosphere during Covid 19. Furthermore, through the summer coursework program, it is hoped that the collaboration that has been well established between UNDIP and foreign partner universities will increase.

OBJECTIVES

1. Experience a new culture

The participants will gain better understanding for people with different culture, and can really make them feel as a “part of the world”. They will have a new insight about how to life in Indonesia and the differences with their home country. After the program, they will enjoy sharing new culture with those around them. It will be the free promotion to promote UNDIP and Indonesia.

2. Personal development

Summer program also give the opportunity to exchange their cultures and make friends with others participant. Its also to enhance their english language skills in both speaking and listening in international atmosphere. The other expected output for the participants is the participants can learn about Indonesian cultures.

3. Develop international networks to enhance collaboration in education and research.

Increasing a collaborative culture across scientific disciplines in a multicultural atmosphere for the students and the academic community in UNDIP.
